

ASIAN INTERNATIONAL SCHOOL-RUWAIS

SCIENCE WEEK 2018

Asian International School organized the Science Week from 14th October 2018 to 20th October 2018, with the tagline '*If you cannot reuse it, refuse it*' with the aim to **HEAL THE WORLD**.

The students of senior school from grades VI to XII participated in large numbers in different activities which aimed at bringing out the team spirit, competitiveness, creative thinking, innovation and artistic skills in Science.

Day 1 saw the students debating on the topic Artificial Intelligence: a boon or a bane, and is Banning certain food a solution to lifestyle diseases. The students were very assertive in their views and countered their opponents with confidence.

One Act play, highlighting the achievements of a great scientist, was recreated by the students in a way which brought smiles and laughter in the auditorium.

Inter House Quiz competition saw the students fighting it out with a competition spirit and team spirit was evident in all the participants.

Competitions organized varied from Inter-house quiz, to debates and one act plays in which the students participated actively in large numbers. The week long programme ended with the Science Exhibition in which almost all the students participated, showcasing 140 projects based on Recycling and Reusing the available resources and Artificial Intelligence. Students from the commerce department also presented projects to showcase the application of artificial Intelligence and marketing strategies .

Projects based on Healing the world included recycling used plastics to profitable oils, Seabin to clean the oceans, harnessing Kinetic energy to convert into electrical energy. Projects on Artificial Intelligence drew attention from the crowds and visitors with their robots performing different functions.

The students were encouraged and motivated further with the beautifully designed certificates and trophies for the winners and runners up.

Science Week and its activities refreshed the young minds and instilled in them a need for creativity and innovation.
